

Touchless Car Operating System

The **Dupar** touchless car operating system brings touchless technology inside the lift car. The system actively monitors the area above the pushbuttons and is programmed to register calls when the user hovers their finger near the button. The sleek design and standalone nature of the system makes it perfect for new or existing installations.

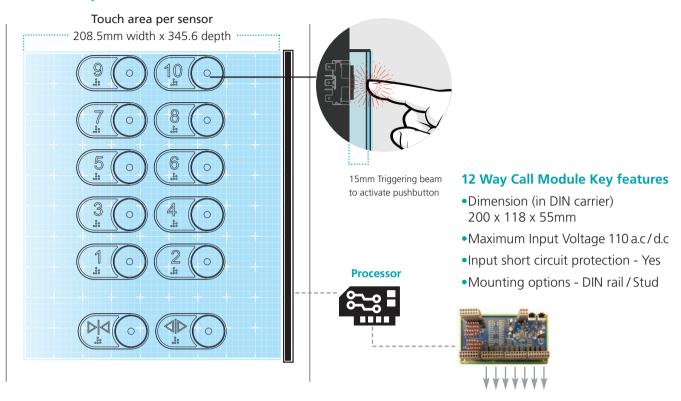

Key features

- ✓ Touchless operation reduces transmission of germs
- Retrofittable to existing installations
- Customisable to your panel layout
- ✓ Works alongside traditional pushbuttons for code compliance
